

Materials

- Carbon Graphite** : Excellent self-lubricating properties for general applications.
- Tungsten Carbide** : High fracture toughness for heavy-duty environments.
- Silicon Carbide** : Superior hardness and thermal conductivity for extreme conditions.
- Ceramic** : Outstanding chemical resistance for corrosive media.

Key Benefits

- Enhanced equipment reliability.
- Reduced maintenance downtime.
- Versatile compatibility with diverse industrial machinery.

MECHANICAL SEAL FACES

Sealventures India offers precision-engineered mechanical seal faces in materials like **Carbon Graphite, Tungsten Carbide, Silicon Carbide, and Ceramic** for reliable sealing in diverse rotating equipment.
